

New Whites from Avery Dennison

The White Wine Rainbow

White is the most-used colour in wine labels, with different shades needed to reflect specific application needs and brand images. The Avery Dennison White Rainbow materials broaden our wine labelling range still further, and offer you unique opportunities to differentiate.

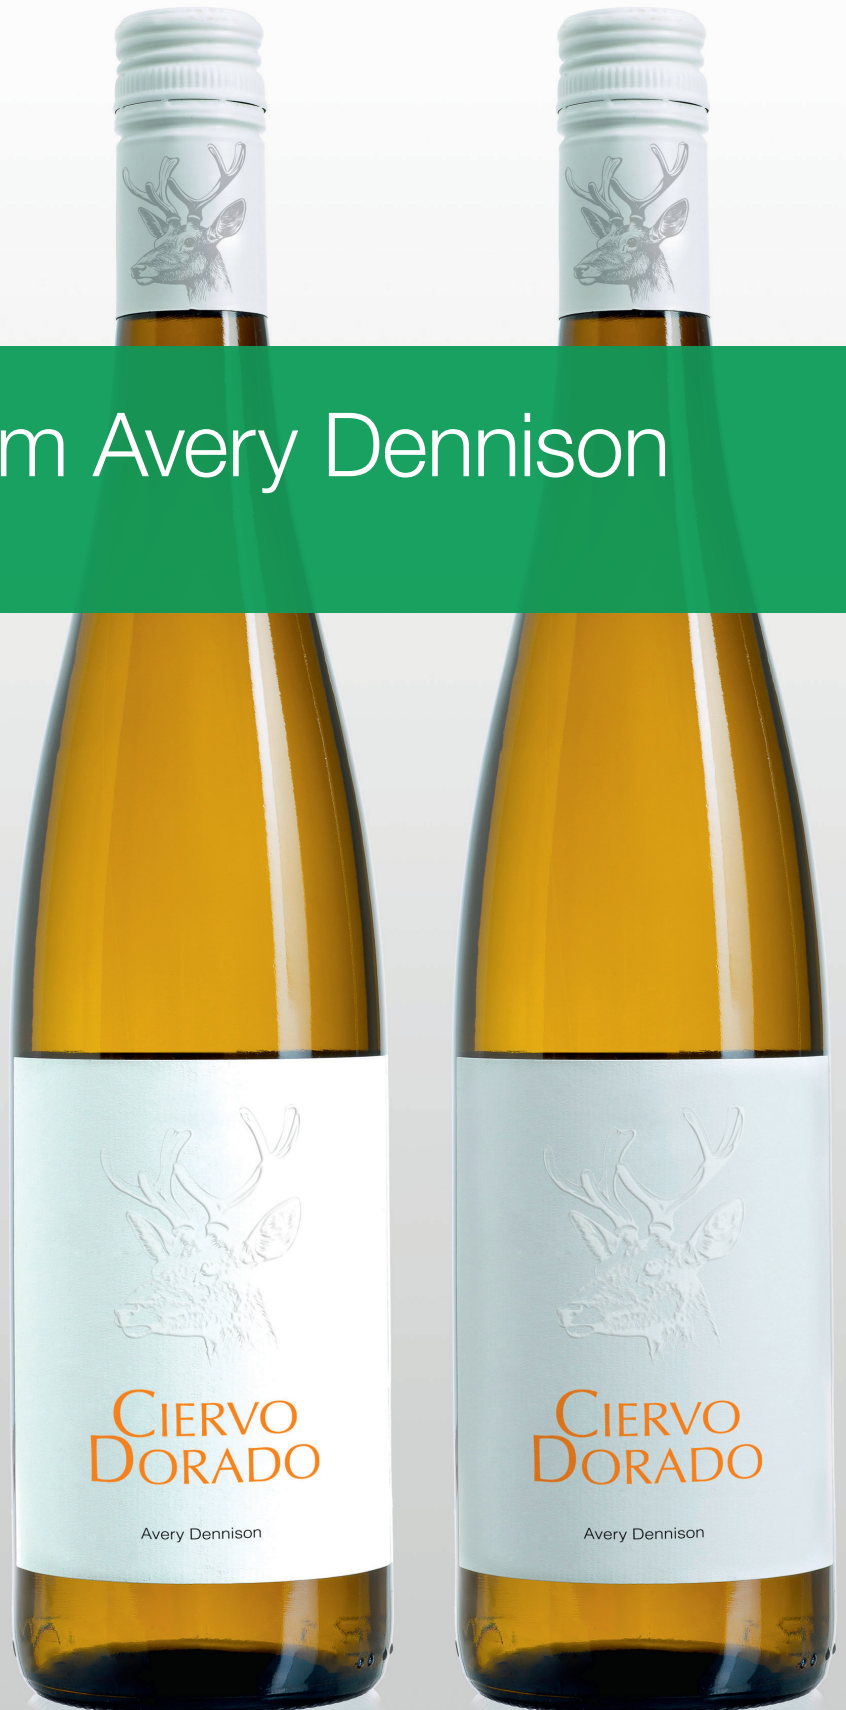

New extra-white papers give you optimal colours when printing – the brighter the white, the greater the contrast. They also deliver improvements to the appearance of fine details.

New textured papers are available too, allowing you to create unique labels with a strong brand presence.

All five White Rainbow papers will ensure impact on the shelf: this range of papers takes its inspiration from global trends, and fits a variety of consumer targets.

FAST FACTS

- > White is the leading wine label colour
- > Retail shelves are seeing intense wine brand competition
- > White Rainbow materials give your brand:
 - » Higher visibility on the shelf, using exclusive colours and textures
 - » More choice when differentiating
