Opportunities

'Engineered Solutions' is a service that helps you develop custom products that differentiate your business and grow your bottom line. Take advantage and connect with the Engineered Solutions team, featuring some of the label and packaging materials industry's most experienced professionals. This team is dedicated to helping you be first to market with solutions meeting your clients' needs.

Avery Dennison technical leaders play a crucial role in uncovering and explaining the latest innovation trends and broad market developments. They are component experts who help in the design and manufacturing of custom solutions for our customers' unique challenges.

Label and
Packaging Materials

Select Solutions™ Piggyback Portfolio

Dynamic and unique

“Label-on-label” constructions speed handling, save cost.

Piggyback labels are multi-layer constructions featuring one self-adhesive label on top of another. The top label is removable and can be reapplied elsewhere, while the bottom label is stationary, remaining affixed to the original surface. Dynamic and versatile, piggyback labels can be created in constructions that adhere to paper, plastics, cardboard and metals. Top labels can be smaller than bottom labels for fast and easy removal, or they can be the same size with or without tabs for removal.

Whether clear middle-ply features to reveal additional messaging or instruction... as image liner piggybacks offering the convenience of a pressure-sensitive document label with a carbon copy label... or for bar code scanning at checkout when items are too heavy to carry... there's an Avery Dennison piggyback to streamline processes and increase productivity.

Portfolio Components

- Films
- Semi-gloss paper
- Direct thermal paper
- Thermal transfer paper

Portfolio Characteristics

- “Label-on-label” multi-layer constructions
- Available in a wide variety of materials and adhesives, including removables
- Film piggybacks offer weather resistance and conformability

Applications and Markets

- Inventory management
- Promotional labels
- Work-in-process labels

Select Solutions™ Drum Portfolio

Versatile • Durable • Proven

Wide Range of Material with Proven Performance

Seeking a reliable solution for labelling industrial drums carrying critical chemicals? The Avery Dennison Select Solutions Drum portfolio offers an impressive track record of proven performance on a broad range of container sizes, diameters and surfaces.

Whether for painted steel or molded polyethylene drums, our film and heavyweight paper facestocks have been chosen for their ability to withstand harsh environments and outdoor exposures. Heat, cold, rain, snow, saltwater... our drum labels can handle it all, offering consistent printability and readability over the life of the drum, no matter the climate or environmental changes. In fact, all our drum portfolio facestocks have passed BS 5609 Section 2 Marine Immersion label testing, including a three month exposure to saltwater, as part of International Maritime Dangerous Goods (IMDG certification).

Our drum portfolio facestocks are combined with our best in-class adhesives to offer needed versatility. Because these

large labels are typically hand-applied, drum adhesive must be immediately repositionable to amend misapplied or misaligned label applications. The adhesive must also wet-out quickly to become permanent, remaining highly durable over a drum's long-term exposure to the elements.

Portfolio Components

- Durable, pressure-sensitive films for point-of-use labels printed on-site at various manufacturing and shipping locations
- A range of repositionable adhesives

Portfolio Characteristics

- Consistent adherence to a range of drum surfaces
- Strong enough to withstand ongoing outdoor exposure
- Weather- and temperature-resistant
- Impervious to contact with aggressive chemicals and saltwater
- Highly adaptable to varying container sizes and diameters
- A range of cost and performance options
- Materials suitable for thermal transfer and laser printing

Select Solutions™ Cover-up Portfolio

High-opacity barrier coating on paper or film corrects errors and covers-up outdated information on packaging, labels and containers.

Typos, changes, omissions, updates ... no matter the mistake or need to re-label, Avery Dennison's Select Solutions Cover-up portfolio can make it right.

Available in a variety of facestocks with a range of adhesives from removable to hammerlock for heavy holding, our Cover-up papers and films are suitable for many applications – and many application environments. Cardboard, wood, textured surfaces ... no matter the material, Cover-up has it covered, obscuring information and multicolour graphics even on clear containers. Sell it to brand owners or use it on press to re-run jobs – Cover-up cuts the high cost of having to start over from scratch.

Lay-flat liner option available for sheeted applications.

Portfolio Components

Durable, pressure-sensitive films, coated and uncoated papers

- Gloss
- Semi-gloss
- Matte Litho
- Trans Thermal
- Direct Thermal
- Inverted Foil
- Inverted Metallised Primax®

A range of adhesives

- Removable
- All-Temperature
- Hammerlock

Portfolio Characteristics

- More cost-effective and convenient than removing old labels or replacing entire packages
- Easily masks obsolete variable information, barcodes and pricing
- New data is easy to read and completely scannable

Applications

- Logistics and Transport
- Pharmaceutical
- Industrial Chemical Labelling
- Food and Retail Promotions
- Home and Personal Care

With more than \$4B revenue lost globally each year from counterfeited consumer goods, brand protection and security are a number one priority. Counterfeiting can impact brand's revenue and negatively affect consumer perception, further eroding its value.

Avery Dennison's Select Solutions Brand Protection and Security portfolio products provide you with a tier of anti-tamper and anti-counterfeit solutions that deliver peace of mind to you and your customers. From destructible films to void materials, our solutions combine the best of global security with shelf appeal. Whether you select overt, covert or customised solutions, our technologies will protect both the immediate and long-term value of your brand.

Select Solutions™ Brand Protection and Security Portfolio

Anti-tamper and anti-counterfeit solutions reinforce quality and assure authenticity

Portfolio Characteristics

- Customisable UV and IR print options
- Enhanced thermal transfer graphic solutions
- Chemical resistant coating for liquid products
- Adhesion to a wide range of substrates including paper, cardboard, metals, plastics, glass and even fabrics

Applications and Markets

- Home and Personal Care
- Consumer Packaged Goods

On-the-go consumers are demanding more convenient, easy-to-use functional packaging; Avery Dennison's Select Solutions Reclosure Portfolio has been designed to deliver just that. Our innovative packaging solutions meet various application parameters from dry to high moisture, providing the kind of innovative, cost-effective alternatives to zippers and hard case reclose packaging brand owners are seeking.

Reclose labels are designed for the easy opening and/or multiple open-close cycling of flexible packaging. They provide an economical method of repeated pack sealing – combined with branding – in one label.

Select Solutions™ Reclosure Portfolio

Cost-effective, user-friendly alternatives combine convenience with branding.

- Wet applications, such as wet wipes, include water, scents, oils and chemicals within the saturating fluid that come in direct contact with the adhesive. Wet applications can also include packages containing food (such as deli meats), water or oils.
- Dry applications include such products as paper tissues or food, items like rice, pasta or coffee.

Our portfolio of film facestocks and reclose adhesives has been specifically designed to meet wet and dry applications. Able to deliver high-quality graphics, these facestocks and adhesives also provide increased operational efficiency as well as excellent reclose functionality.

Portfolio Components

- PET Films
- BOPP Films
- Reclose Adhesives

Portfolio Characteristics

- Works with wet or dry applications
- Can be over-laminated with transparent PP or PET films for added stiffness
- Various types of seal strength and peel “feel”
- Good moisture, solvent, fat and oil resistance

Applications and Markets

- Home and Personal Care
- Food

Select Solutions™ Apparel Portfolio

Thermal transfer printable options for sizing strips and other pressure-sensitive graphic apparel applications

The new Avery Dennison Select Solutions Apparel portfolio gives you more pressure-sensitive options for greater opportunities with brand owners and retailers looking to differentiate their products at the store level. From a rustic, natural-look paper to clear and white Transcode films featuring exceptional thermal transfer and rotary press printability, our new Apparel Portfolio provides the application flexibility you need for brand-focused apparel and textile labelling.

Apparel label materials are offered with your choice of brown and white liners in various weights and thicknesses, as well as a range of adhesives designed for good adhesion to and easy removal from many fabrics, including sports performance fabrics.

For sizing strips, the Apparel portfolio's thinner material options provide greater conformability for easier folding when stacking garments on shelves.

Portfolio Components

- A range of clear, white materials
- Adhesives specifically designed for application to and easy removal from fabrics without residue

Applications

- Apparel – jeans, pants, sportswear, menswear, children's wear, socks, shoes, sweaters and more
- Textiles – blankets and bedding

Make It Easy to Choose the Right Removable for the Job.

The Avery Dennison Select Solutions Removables portfolio is a convenient tool designed to simplify the often-confusing world of removable labelling. The portfolio offers:

- A proven core of robust, multipurpose products that address a range of application needs from simple to complex
- Using our detailed adhesive performance charts, an easier way to select the proper label construction for your application
- Separate paper and film featuring solutions developed for a variety of performance requirements
- Cost-effective, application-based solutions with shorter time to market, due to regional service programs, minimum order quantities as low as 540 msi, fast quotes and fast shipping

Broad Selection of Purpose-Built Removables

You can depend on our Removables portfolio to deliver a breadth of technologies that can position you to move into new markets with confidence. Suited for an array of applications, the portfolio provides targeted solutions with stable tack across the label's lifespan, clean removal and the substrate versatility you need.

Select Solutions™ Removables Portfolio

Taking the Time and Complexity Out of Removable Labelling

Partnership Approach

Take advantage of the Select Solutions Removables portfolio and the Avery Dennison team to grow your removables business. Our global team – including adhesive research experts, technical specialists and market professionals – can readily suggest a product to meet your application needs. If a product does not exist, our engineered solutions team can create a specialised solution just for you and your customer - expanding your breadth of products and offering the right custom solution.

Promotion Labels

Available in a wealth of bold, bright colors, Avery Dennison promotional label materials for food industry applications are as versatile as they are functional, improving supply chain visibility, waste reduction and freshness labeling. Used as inventory and warning labels, as well as eye-catching advertising and promotional labels, fluorescents demand attention. They not only communicate important data, they also boost consumer impulse buying due to their immediate shelf impact.

Select Solutions™ Promotion Portfolio

Portfolio Characteristics

- Product for manual application to multiple substrate, rough surface.
- Excellent printed result film products by conventional press.

Tyre Labelling Solutions

Productive and reliable materials for tread labels and vulcanising labels

Tyres present unique labelling challenges for brands and label converters alike, whether creating marketing or product identification labels. A rough, low energy surface makes specialist labelling technology essential. Missing labels mean lost profits and a tyre often has to withstand very heavy handling/storage challenges long before it ever makes its way on to a car wheel.

Both brand labels and energy labels are now a standard requirement, with the latter now compulsory in the EU (since November 2012).

Avery Dennison offers the high performance labelling materials needed to make sure that labels look good and stay in position, whether applied to the tread or vulcanised along with the tyre. Extensive segment experience means we can ensure that productivity remains high throughout, from the conventional print converting phase all the way through to thermal transfer printing by end-users.

Portfolio Characteristics

- Excellent heat and abrasion resistance for vulcanised labels
- Excellent thermal transfer printability where required
- Rubber-friendly higher adhesive coat weights
- Production-friendly gum patterns to eliminate bleeding
- Application specific coat weights (winter/summer, hairy/shaven)
- Special silicone systems for easy automatic dispensing
- Back-side siliconisation option to avoid labels sticking to liner

Durable Solutions

High-performance Labels for Durable Applications

Durable goods face many different challenges over time. You need confidence that the label you choose will stay in place and also look good for as long as it takes.

Avery Dennison's cost-effective durables materials deliver high performance applications in cars, electrical appliances, electronics, tyres and beyond. You can safeguard essential product and security information, or create the visual impact needed for compelling point-of-sale labels.

A choice of many different adhesive technologies and facestocks lets you meet both technical and market-driven challenges more easily, whether designing cost-effective and straightforward applications or high-end speciality products. Avery Dennison can help you to choose a laminate that matches your own quality/image criteria, or the right removable product that will meet customer specifications and fully protect an underlying surface. We can also help you to meet strict automotive OEM specifications, and compliance standards such as UL969, CSA, IMDS among others.

Portfolio Characteristics

- Broad portfolio meeting requirements from basic to high-end
- Excellent service with low Minimum Order Quantities and short lead times
- Locally provided technical support to select a fit-for-purpose label material

Application Areas

- Automotive
- Electrical appliances
- Electronics

Mix & Match™

Customise, Innovate, Differentiate
Custom Constructions Simplified for Optimal Performance

The Select Solutions Mix & Match Service leverages Avery Dennison's expertise in helping customers find the right labelling solutions for their specific application needs, including specialty and challenging label constructions.

Thousands Possible Combinations

Many different face materials, adhesives and liners are available from stock under Avery Dennison's Mix & Match Service, with a low minimum order quantity (MOQ) and fast shipping. Extensive customisation is possible to achieve high performance and very sophisticated labelling materials, including all of the following:

- Piggybacks (multi-layer constructions)
- Special gum pattern
- Transfer Tapes
- Gum twins
- Back splits
- Varying opacity in different colours
- Adhesive luminescence
- Custom coating

Mix & Match products are typically one metre wide, with a two-metre coating width often possible depending on volume and product. Note that if none of the thousands possible Mix & Match combinations meet your requirements, Avery Dennison can work closely with you to find and produce the right engineered solution.

Portfolio Characteristics

- Custom facestock, adhesive and liner combinations on request
- Access to more than thousands potential laminates, piggybacks, gum patterns and much more
- All adhesive technologies: emulsion, hotmelt, UV-hotmelt, solvent
- Low MOQs and short lead times

Application Areas

Primary, enhanced and premium Avery Dennison laminates already cover a vast range of potential applications. The Mix & Match service is designed for those projects that need a little bit extra - very specific label properties that may not be available off the shelf.

Mix & Match allows label converters to request a precise combination of adhesive, face-material and release liner. It opens up whole new opportunities to innovate and differentiate. As with all Avery Dennison products, extensive support comes as standard, for printers, converters, packers and end-users. A technical specialist can help to determine which existing or tailor made product is the optimal solution for any given application.

Customise, innovate, differentiate: Mix & Match

Our product offering

Special Gum Patterns (SGP)

Ungummed zones can be specified to match your needs. Depending on the adhesive required, a special gum pattern can sometimes be offered on a two-metre coating width.

Piggybacks (PB)

Standard piggyback constructions use a printable facestock (paper or film), two adhesive layers and two layers of siliconised release liners, using different release levels to ensure proper dispensing. More than two layers can be created where the application demands it. See also the Piggyback Product Overview for more information on our standard Piggyback product range.

Transfer Tapes (TT)

Transfer tape constructions use two release liners with an adhesive in between. Typically used to make your own laminates or self-adhesive label.

Gum Twin (GT)

Typical gum twin constructions have a carrier in the middle, with two adhesive layers and release liners at front and back. Highly sophisticated labels are possible and typical applications include the following:

- large or stiff self-adhesive products
- self-adhesive photos
- promotional applications such as detachable game cards (with permanent adhesive on a brochure, letter or product and removable adhesive on the game card)

In the case of a more specific request, an Avery Dennison technical specialist can help you to determine which existing or tailor made product will be the optimal solution for your needs.

For more information on technical performance and printing recommendations, please refer to the respective datasheets.

Please note that the Avery Dennison product range and service offering can be subject to changes. For an accurate overview, please check our website http://label.averydennison.asia/en_asean or contact your local Avery Dennison sales representative.

Select Solutions Experts. Across-the-board Help.

You can count on Avery Dennison experts to help you find the products and solutions that work for you and your customers.
