RFID in beauty

Avery Dennison RFID delivers tagging solutions that increase item level inventory accuracy, improve loss prevention and create endless opportunities to enhance consumer engagement and brand loyalty.

- RFID efficiently and accurately manages complex SKU and color variations to minimize losses.
- Avery Dennison RFID inlays provide excellent readability on everything from small sizes to liquid to metal packaging.
- RFID field-tested inlay solutions will improve inventory accuracy from 30-70% to up to 99.8%.
- RFID efficiently and accurately manages complex SKU and color variations to minimize losses.
- Inventory accuracy and visibility helps increase sales in omnichannel retailing. With RFID enabled visibility, brands and retailers can now pick to the last unit.
- Loss visibility for high shrink items.
