

# Blood and plasma bag labels

NEW

Blood and plasma bags present unique labelling challenges. Low-temperature performance is essential, to enable storage in refrigerators and freezers, and other demanding criteria must be met.

Permanent adhesion is required for reliable identification – without ‘backup’ methods such as using rubber bands. Labels also have to offer simplicity to busy users in hospitals, attaching easily without warming, wiping or drying a bag surface. Avery Dennison blood and plasma labelling materials offer shorter operational times for end-users such as hospitals and blood banks, and lower error rates – with consequent cost savings and reductions in material waste. The portfolio is non-PVC, and meets expected upcoming regulations to stop the use of PVC in these applications.

The labels in our portfolio comply with FDA and European food regulations, and have been approved by ISEGA testing institute according to DIN ISO 3826 for “Plastic Collapsible Containers for Human Blood and Blood Components”.

## Key features

- ▶ Strong adhesion at low temperatures
- ▶ Labels follows curvy surfaces – easier to attach
- ▶ PVC-free (no DEHP plasticizer content)
- ▶ Helps reduce waste of life-saving products

## Application areas

- ▶ Plasma bag labelling
- ▶ Pharmaceutical applications at low temperatures
- ▶ Human and animal health: blood fractioning, stem cells, serum ,primary blood bag label

## Product information
