

Tamper-evident labelling solutions

Avery Dennison FMD Portfolio helps protect your brand

Drug counterfeiting is a major global problem. Patient safety is compromised by product manipulation or substitution, and manufacturers can experience damage to their brand image, sales and revenue.

European Union Directive 2011/62/EU, article 54(o), is designed to prevent “falsified medicines” entering the legal supply chain and reaching patients. It applies to all prescription products (except radiopharmaceuticals) and requires outer packaging to reveal any tampering, from February 2019 onwards.

Avery Dennison offers a broad portfolio of anti-tamper and anti-counterfeiting pharmaceutical labelling solutions to reduce the risk of packaging falsification; including VOID labels, destructible labels and box damage films.

Key features

- ▶ A broad anti-tamper and anti-counterfeiting portfolio
- ▶ Supports compliance with EU Directive 2011/62/EU, article 54(o)
- ▶ Protects patient safety and brand reputations
- ▶ Full technical support for ‘layered’ custom solutions
- ▶ Basic features through to high-end technologies

Application Areas

- ▶ Prescription medicines
- ▶ Brand protection
