Reclosure solutions for food applications

Resealable labels are valued by consumers, giving them open/ close packages that prevent food contamination and spills. Brand owners also benefit, because food products stay in their original packaging, increasing brand exposure in the home.

Labels placed anywhere on a pack can be removed or reapplied as desired without leaving adhesive residue. They are a cost-effective and efficient alternative to zippers or hard reclose packaging.

The Avery Dennison reclosure range for food suits applications ranging from simple dry goods needing a limited number of opens/reclosures through to products with challenging contents – with adhesives that perform time after time.

Key features

- ► Food compliant, topcoated materials
- ► Three food-friendly adhesives
- ► Simple or high performance applications
- ▶ Safe to use in all food contact applications

Application areas

- ▶ Dry foods
- ► Frozen foods
- ► Fresh foods

Adhesives for dry reclosure

C3

C3 is a highly transparent adhesive with high ageing stability, suitable for dry food reclosure applications

R5050

For more demanding applications, R5050 features good tack and adhesion in combination with superior and clean removability from most substrates. The adhesive allows label application at a wide temperature range, and it retains its removable properties even at very low temperatures.

R1490M

For very demanding dry, food reclosure applications. The adhesive show good moisture and solvent resistance, clean removability and a smooth and quiet peel from PET and PP substrates.
