

HP Indigo Label Material

Printing labels with HP Indigo technology requires adding a topcoat to your materials. However, priming materials can be challenging, especially with materials that have special finishes or textures. Pre-priming materials is the best way to ensure uniformity of the topcoat on the substrate and preserve color accuracy.

The wide variety of materials in our HP Indigo Portfolio are pre-primed in our manufacturing facilities, ensuring uniform application, higher color accuracy and optimal performance – plus all the advantages that come with printing on HP Indigo presses and digital printers.

Key features

- Variety of film materials to cater for different shelf appeal
- Pre-primed facestock material, ensuring uniform application, hence more consistent color transfer.
- Reliable and optimal performance

Application areas

- Wine and spirits
- Food
- Home and personal care
- Reclosures and removables
- General purpose
