ASEAN September 2023

Performance that goes the distance

Labels for the automotive segment have to cope with a range of challenges – harsh chemical environments, challenging substrates and the stresses imposed by vehicle wear and tear

The Select Solutions Automotive portfolio contains materials with proven performance in the most extreme environments, meeting the needs of all supply chain processes, industry regulations and OEM testing parameters.

Key features

- Full range of self-adhesive materials, including multiple facestocks and adhesives
- Excellent adhesion to a wide range of substrates, including rough and low surface energy plastics
- · High temperature and chemical resistance
- Durable performance in harsh environments
- Compliant with REACH, RoHS, IMDS and common testing parameters specified by automotive OEMs

Application areas

- Exterior: Fuel cap, tire pressure and tracking/ service labels
- Interior: Airbag, security/anti-counterfeit, warning, instruction and tracking labels
- Under-the-hood: Labels for heat/chemical-resistant warnings, engine component instructions, tracking, fluid containers, car batteries and cables
