

Cover-Up Opaque

Cover Up labels enable relabelling without repackaging

High-opacity barrier coating, on paper or film, hides errors and covers outdated information on packaging, labels, and containers. No matter what the relabelling need, Avery Dennison's Cover-up portfolio can make it right without the high cost of repackaging, with reduced harm to the environment.

Almost every packaged product will need to have its labeling changed or adapted at some point in its life. It is crucial to ensure that any over-labelling is truly opaque. This makes the new labels fully legible and, especially for correction labels, ensures that overprinted data is hidden. Avery Dennison opaque label stocks offer label converters and their customers an unrivalled range of options in both paper and film, with permanent and removable adhesives. The range is a genuine one-stop shop for all correction applications, and the sheer quantity of choices available allows for highly creative solutions. Most paper or film products can be customised on demand to use a specific opaque colour - for example, an attractive coloured background on a clear bottle.

Key features

- Opaque prime films
- Opaque prime papers
- Opaque VI front materials
- A selection of standard colours and multiple opaque layers
- Customising colours

Application areas

- Correction labels
- Translation labels
- Promotional labels
- Shipping and tracking labels
