

# Cable labelling

---

## Identification of every cable with a cable label

Keeping track of cables in cabinets, workstations and offices is essential when installing, repairing or troubleshooting. Reliable part identification and branding depend on good printability, usually with thermal transfer printers and ribbons.

Smaller diameter cables need more flexible films and higher performance adhesives. Avery Dennison materials minimize 'butterflying' by combining a flexible film with a high cohesion, high shear adhesive.

## Key features

- ▶ Good printability
- ▶ Good resistance to 'butterflying'
- ▶ High performance adhesive and flexible facestock
- ▶ UL-recognised, flame retardant and UV-resistant options
- ▶ White, highly flexible materials for flag labels
- ▶ Transparent, highly flexible materials for wrap around solutions

## Application areas

- ▶ Supports wide range of cable applications
- ▶ Flag labels with space for text/barcodes
- ▶ Wrap-around labels where space is limited

## Product information

Product Code	Product Description	Size (mm x mtrs)	Location	Lead Time
BW0116Q	FASSON WHTPPMATTC/S692N/BG40 BLUE	1500 X 1000	Gurgaon	2 Days
AM09070	FASSON FASFILM PLUS WHIT/PERMANENT(ST)/BG40	1000 X 2000	Pune	7 Days
75943	FASSON 2.6 MIL WHITE TCBOPP/S730/50#SCK	1371 X 2000	Pune	2 Days
NEW 79554	3.25 MIL CLEAR VINYL NTC.S8025.50#SCK	1371 X 1418	Pune	PTO

PTO - Procured to Order

### Flag labels

Flag labels offer a lot of space for printed text or barcodes. Avery Dennison products use a white, flexible facestock and high-performance adhesive for optimum long term bonding.

### Wrap-around labels

Wrap-around labels provide less space for printed information, giving a cleaner look – especially when labelling multiple cables when flag labels can look cluttered. A white text field is typically printed onto a transparent material, allowing the end-user to first create printed information, then apply the label around the cable and overlamine the print by wrapping the transparent label around the white, thermal transfer printed area.
