

Digital Sheets

**Technologies for
differentiation, cost
efficiency, quality
and sustainability**

Investment is growing rapidly in digital printing technology to meet the needs of today's brand owners for greater brand differentiation, customization and flexibility.

Digital printing helps brand owners target higher sales through multi-versioning and mass customizations, and improve communication with consumers by enabling quick changeovers and variable information printing. Digital printing also realizes lower costs, because printing on demand dramatically reduces costs associated with inventory and revisions.

These solutions have applications in proofing jobs, POP promotional labels and short-run/small-volume applications. The portfolio also offers specially developed digital label printing solutions for customers using toner-based laser printing press/platforms.

As always, Avery Dennison strives to lead the market with the latest improvements and innovations in digital product solutions.
