

General Purpose Nonwoven Tapes

Nonwoven tapes for generic applications

Soft and slim generic use tape with interlocked cell structure to achieve better wetting and enhance cohesion. Compared to filmic tapes, these products offer stronger conformability and better bonding strength to irregular substrates such as foams.

Features

- ▶ Improve dimensional stability to reduce cold flow during conversion and strengthen tear strength
- ▶ Higher cohesion during aging tests.
- ▶ Strong peel adhesion as well to various substrates and superior cohesion under elevated temperature
- ▶ Provides different kind of liners with Avery Dennison logo imprint

Benefits

- ▶ Improve anti-oozing performance during converting and assembling process
- ▶ Reduced scrap ratio during repositioning process
- ▶ Eliminate the edge pick after conversion
- ▶ Excellent conformability to rough surfaces

Applications

- ▶ Metal to Glass Bonding
- ▶ Control Panel Attachment
- ▶ Door Glass Bonding
- ▶ Decorative Trims
- ▶ Evaporator Plate
- ▶ Condenser Plate
- ▶ Printers
- ▶ Labels
- ▶ Gasket Mounting
- ▶ Antenna Mounting

Product information

Product Code	Short Description
FT 7508L	80 Micron Nonwoven Tape
FT 7512L	120 Micron Nonwoven Tape
FT 7515L	150 Micron Nonwoven Tape
