

# rSable FSC

Address increasing consumer awareness,  
reach your sustainability goals,  
and stand out on the shelf

As the latest addition to our sustainable wine labels portfolio, rSable is an FSC-certified woodfree 85 gsm paper made 100% from post-industrial and post-consumer waste, featuring a white uncoated smooth texture with wet strength, fungicidal treatments and good wet opacity.

rSable is available with **AD rPLUS** underlamine, which contains 25% post consumer recycled content, ensuring optimum performances in the ice bucket and minimizing the risk of wrinkling and bubbling of the label.

Compared with Artisan FSC (the traditional equivalent of rSable), rSable reduces carbon emissions by 12% and water usage by 21%.

Description	GSM	Service Programme	Stocking Site	Sample availability
rSABLE FSC rS2030 BG40WHN	85 g/m <sup>2</sup>	Full Deckle	VIC	Jan '24
rSABLE FSC rS2030 rPET30	85 g/m <sup>2</sup>	Full Deckle	VIC	Jan '24
