

Waste has never looked this good

Made from up to 100% recycled paper, rMC labels combine sustainability with impeccable quality

Modern consumers want packaging with a smaller carbon footprint. Meeting their demands is easier with rMC labels, which are part of our rRange collection and made entirely from recycled paper waste. A great way to reinforce a brand's commitment to sustainability, they are suitable for all label shapes and designs, giving you access to a world of possibilities.

All rMC products feature these benefits:

- Have an attractive semi-gloss appearance
- Offer excellent print quality with conventional, digital and thermal transfer printing
- Provide the same converting performance as standard grade alternatives
- Approved for direct contact with dry foodstuffs
- Require less water and energy to manufacture than standard non-recycled alternatives
