
Totally new. Totally recycled.

Introducing 100% recycled resin PE Top White

We're excited to announce a PE film made entirely from recycled resin content – our **100% PE Top White**. Like all products in our rPE family, our newest addition consumes fewer resources, helps keep plastic out of the waste stream, and gives packaging a more authentic look.

- Made of 50% post-consumer recycle and 50% post-industrial recycle
- Comes with TC7007 topcoat, the industry benchmark
- Perfect for curved substrates and squeezable containers in home and personal care, cosmetics and food

To find out more about recycled PE labels and other sustainable label and packaging materials, visit: label.averydennison.com/sustainability or contact your Avery Dennison sales representative.
