

02/2023

Dichiarazione di identificazione secondo la Direttiva 97/129/CE per i materiali autoadesivi Avery Dennison

In base al DL 116 del 3 settembre 2020, dal 1° gennaio 2023 è diventato obbligatorio identificare i materiali di imballaggio immessi sul mercato italiano, secondo quanto previsto dalla direttiva 97/129/CE.

Le etichette autoadesive che presentano come frontale uno dei materiali di imballaggio (carta, plastica, acciaio, alluminio, legno, vetro), accoppiato o trattato con un altro materiale, diverso da quelli di imballaggio (es. colle, adesivi, inchiostri), sono da considerarsi monomateriale e vanno conferite nella raccolta differenziata di riferimento. Inoltre i codici dei frontali e dei supporti siliconati dei laminati autoadesivi sono assegnati in maniera individuale, in quanto questi componenti sono separabili manualmente l'uno dall'altro.

È importante infine ricordare che l'identificazione della natura del materiale della sola etichetta non è sufficiente per determinare la riciclabilità dell'imballaggio primario su cui vengono apposte. Generalmente è infatti la tipologia e composizione del packaging primario a determinarne il relativo flusso di riciclo, indipendentemente dalla natura delle etichette. Vi sono tuttavia diversi casi nei quali è importante scegliere correttamente il materiale autoadesivo utilizzato, in modo da consentire ai riciclatori la corretta identificazione del packaging primario e garantire che sia riciclato in maniera ottimale. Per ulteriori informazioni sulla riciclabilità può contattare il suo referente commerciale o customer service di riferimento.

Per facilitare la corretta identificazione dei materiali di cui sono composte le etichette può consultare nel documento allegato l'elenco dei codici relativi ai frontali (tabella 1) e ai supporti siliconati (tabella 2). Se per un determinato frontale e/o supporto non si dovesse riuscire ad identificare il codice, la preghiamo di fare riferimento al suo referente commerciale o al servizio clienti.

Disclaimer

All Avery Dennison statements, technical information and recommendations are based on tests believed to be reliable but do not constitute a guarantee or warranty. All Avery Dennison products are sold with the understanding that purchaser has independently determined the suitability of such products for its purposes. All Avery Dennison's products are sold subject to Avery Dennison's general terms and conditions of sale, see <http://terms.europe.averydennison.com>
