

Avery Dennison: Label and Packaging Materials

Information on the REACH Legislation is available [here](#).

Complying with REACH regulation

Legislation on the use of chemicals in the European Union (EU) was streamlined and improved on December 18, 2006. On that date, REACH legislation became law (Registration, Evaluation, Authorisation and restriction of Chemicals).

There is now a greater responsibility placed on industry to manage the risks that chemicals may pose to health and the environment. REACH applies to most common substances used in day-to-day life.

From the very beginning, Avery Dennison anticipated the likely impact of REACH on its manufacturing operations. A key priority was to ensure a smooth transition, complying with all relevant aspects of new regulations and avoiding any disruption to customer supplies.

As a downstream user of chemicals, Avery Dennison Label and Packaging Materials collaborates closely with all suppliers to maintain REACH compliance. This includes ongoing monitoring of registrations for all substances in its product.

Avery Dennison notifies customers and the European Chemical Agency (ECHA) if a substance of very high concern (SVHC) has been put on the REACH Candidate List and if it is present in one of its articles in concentrations above 0,1% (w/w). Avery Dennison also notifies customers who are purchasing these products, or who have already purchased them. Notifications take place every time additional chemicals are added to the list.

According to REACH article 33 we provide information to our customers on products containing Substances of Very High Concern (SVHC) (updated on 07 November 2024) over a limit of 0.1% (w/w of the article). If you have any questions, please contact your Avery Dennison representative.

The information contained herein is believed to be reliable but Avery Dennison makes no representations concerning the accuracy or correctness of the data. Products should be tested by the customer / user thoroughly under end user conditions to ensure the product meets the particular requirements. Independent results may vary. All Avery Dennison products are sold subject to Avery Dennison's general terms and conditions of sale found at <http://terms.europe.averydennison.com>.
