

BOPP Films Recognized for HDPE Recycling

The Avery Dennison Clear Biaxially Oriented Polypropylene (BOPP) film portfolio has been recognized to comply with the Association of Plastic Recyclers (APR) Critical Guidance Protocol for HDPE recycling. The BOPP portfolio is the first to pass testing and we are committed to expanding the portfolio of film materials with pressure sensitive emulsion acrylic adhesives that meet the APR HDPE Critical Guidance moving forward. This recognition gives brands in the personal care and beauty space, as well as other segments that use Avery Dennison clear BOPP films on high-density polyethylene (HDPE) plastics, validation that the labels stay with the container without impacting the recycling process.
