

APR Recognized Film Labels

Supporting a second life for HDPE Packaging

Avery Dennison films with hot melt adhesives are now recognized by the Association of Plastic Recyclers (APR) for complying with colored HDPE recycling guidelines,

Recognized materials include clear and white machine direction oriented (MDO) and biaxially-oriented polypropylene (BOPP) films for home and personal care applications as well as across the food sector.

Products in this portfolio featuring hot melt adhesives do not hinder the recycling process of colored HDPE, ensuring that the rHDPE is given a second life in new applications.
