

# Avery Dennison®

## BS 5609 Compliant Portfolio

### SECTION TWO (MARINE IMMERSION TEST)

As a leader in labelling materials, Avery Dennison follows strict test protocols aimed at certifying a variety of label materials according to BS 5609 standards. The Drum Label Portfolio includes a list of 63 adhesive-facestock combinations (corresponding to more than 180 product codes) that are compliant with Section two of the BS 5609 (Marine Immersion test). The list is continuously updated with results from the ongoing testing pipeline.

# Avery Dennison® BS 5609 Section three Portfolio & testing service

While BS 5609 Section two applies only to the unprinted adhesive/facestock combination, Avery Dennison is also able to provide an extra service to customers and end-users, by testing the printed facestock. It is crucial that shippers ensure print quality at all times, and Avery Dennison is currently testing a variety of inks and ribbon/printer combinations in order to extend compliance of the Drum Label Portfolio to Section two of the BS 5609 standard. In addition, we offer testing of printed label materials from our customers and end-users for BS 5609 Section three compliance. Our lab facilities and test protocol has been validated by an external lab (UL).
