

# Digital Printing Portfolio

## EFI™ UV Inkjet

Fasson® product constructions shown have been evaluated by Avery Dennison and EFI and are recommended based upon the existing printer ink system utilized at the time of testing. Additional product constructions are available.

These products are available through our EXACT™ and Ready Width™ service programs. The one-slit roll minimum and next-day shipment are a great complement to the short run/quick turn capabilities of digital presses. Please contact your Avery Dennison sales representative for assistance.

See the EXACT Card for current EXACT and Ready Width service program.

- Recommended: Substrate meets Avery Dennison proprietary print testing standards. To earn our recommendation, a specification must demonstrate good print quality, readability and durability. In addition, Durables specs must pass a modified version of cross hatch test ASTM D3359.
- Application Specific: May require further customer-specific testing in order to confirm appropriateness for an application.
- Not Recommended: Indicates one or more of the characteristics failed the graded characteristics within the Avery Dennison test standards.

UL® 969 w/Inks: UL recognized with EFI 4000 and 4950LX inks. UL recognition with inks allows label adoption into an existing UL file. Refer to Avery Dennison UL-Recognized Components Guide for specific details regarding conditions of acceptability. The guide can be found at [www.label.averydennison.com/durablegoods](http://www.label.averydennison.com/durablegoods).

I/O w/ OL: Indoors/Outdoors with addition of overlamine, Spec# 77844: 1 Mil Clear Print Treated PET/S8020/40#BG.

NOTE: As label graphics and performance requirements vary, we encourage end application testing of all materials prior to use. This statement does not constitute a warranty.
