

Digital Printing Portfolio

UV Inkjet

Fasson product constructions listed have been evaluated by Avery Dennison on various UV Inkjet printers, and are recommended based upon the existing printer ink system utilized at the time of testing. Additional product constructions are available.

These products are available through our EXACT™ and Ready Width service programs as noted. The one slit roll minimum and next day shipment are a great complement to the short run/quick turn capabilities of digital presses. Please contact your Avery Dennison sales representative for further assistance.

- Recommended: Substrate meets Avery Dennison proprietary print testing standards. To earn our recommendation, a specification must demonstrate good print quality, readability and durability. In addition, Durables specs must pass a modified version of cross hatch test ASTM D3359.
- Application Specific: May require further customer-specific testing in order to confirm appropriateness for an application.
- Not Recommended: Indicates one or more of the characteristics failed the graded characteristics within the Avery Dennison test standards.

See the EXACT Card for current EXACT and Ready Width service program.

NOTE: As label graphics and performance requirements vary, we encourage end application testing of all materials prior to use.

Testing recommended for wine papers.

This statement does not constitute a warranty.
