

# Direct Thermal Paper No-Phenol-Added

Avery Dennison is proud to introduce our new line of no-phenol-added direct thermal paper products. These products are designed to meet the growing demand for safer and more sustainable labeling solutions.

## Why Avery Dennison

Recent regulations in states like California and Washington are reshaping the landscape for thermal paper products. California's Prop 65 requires warnings for BPS exposure by December 2024, and Washington will completely ban phenol-containing thermal paper by January 2026. Our new portfolio is designed to align with these emerging regulations, offering converters a head start in compliance and sustainability.

## Key Features & Benefits:

- No-Phenol-Added Formulation: No additional phenols were added during the manufacturing process, ensuring labeling solutions that adhere to new state regulations.
- Sustainability: By removing harmful chemicals, our paper contributes to a cleaner environment and aligns with the global push for more sustainable practices.
- Versatile Applications: Suitable for a variety of applications such as logistics, weigh-scale, and retail, our no-phenol-added papers meet diverse industry needs.
- Proactive Compliance: With impending regulations, adopting our portfolio equips you to stay ahead of the curve, reducing potential disruptions to your operations.
