

UV Barrier Label Portfolio

Introducing new UV Barrier Label solutions for pharmaceuticals

Protection without compromise

From safeguarding sensitive medicines to meeting complex regulatory requirements, pharmaceutical packaging faces growing demands. New generations of medicines, such as biologics, vaccines and cell/gene therapies can be susceptible to UV light, which could negatively impact the drug safety and effectiveness.

Our new range of UV barrier label solutions provides high opacity paper and film constructions as well as an innovative clear overlaminated film that maintains full visibility while blocking harmful UV rays - combining protection with usability.

**Highlights of the Clear
UV Barrier Overlam**

- Transparent overlamination film that blocks 95% of UV light below 370 nanometers (nm)
- Enables visual inspection of medicines during administration
- Designed for small diameter containers, such as glass vials and prefilled syringes
- Helps extend shelf life and reduce medicine waste

Spec#	Product Description
High Opacity Labels	
79137	Fasson® 2.3 Mil Metallized White BOPP TC/S692NP/1.2M PET
19577	Fasson® Pharma Semi-Gloss Elite™ FasCover™ FSC®/S246/50#SCK
