

Dissolvables Erase Worry About Contamination

Reduce. Reuse. Relabel.

In busy restaurants and other food preparation and entertainment venues, containers are constantly being reused and relabeled. When products are used up, containers are often washed and filled with another product. But most labels don't come off easily, leaving adhesive and/or label residue behind that bacteria can cling to, increasing the risk of contamination.

Leave No Adhesive Behind.

Dissolvable labels combat possible contamination issues. These labels dissolve and wash away with normal tap water and slight agitation. They are easy to use and provide the ability to follow through complex food processing and handling operations. The label simply disintegrates during the normal washing process and requires no special steps to be discarded.

Time Is Now On Your Side.

In an industry where time is critical, dissolvable labels simplify washing and relabeling processes while countering bacterial growth by eliminating residual adhesive and label materials. Because they don't need to be removed, they save on clean up time, making it possible for employees to spend more time on other tasks.

Create Easy Visuals.

Dissolvable labels provide a surface on reusable containers for clear identification. Without these labels, product ID and expiration dates are difficult to identify.

Safety and Sustainability You Can Use Time and Time Again.

Avery Dennison offers dissolvable label material in its Select Solutions™ Food Rotation and Safety Portfolio that are certified by both the FDA and ISEGA as long as there is a functional barrier (container) between the label and the food product. The material withstands incidental exposure to moisture, yet reliably disintegrates during the standard washing process. And because the paper face is also dissolvable, the product is a more sustainable alternative to standard pressure-sensitive label options.

Our Labels Stick Around. Anywhere You Decide To Use Them.

Avery Dennison dissolvable label material stays put and will not get damaged in the freezer, refrigerator or in ambient conditions, unless it gets wet. It is designed to adhere to a broad spectrum of surface types, as well as across a wide temperature and humidity range. Dissolvable label solutions are highly effective for inventory uses and container date coding. For more information about dissolvable label materials and Avery Dennison's Select Solutions Food Rotation and Safety portfolio, and on how to protect against contamination, go to label.averydennison.com

Streamline washing and refilling processes while reducing possible contamination with Avery Dennison's dissolvable label material.
