

Although a niche market, fire extinguisher labeling can be a key component in driving growth in the durable goods segment. Avery Dennison offers two solutions – UL recognized with inks, ribbons and adhesives – that can make the process of labeling portable dry chemical and powder fire extinguishers (Class D), and stainless steel water-based units (Class A), faster, easier and more affordable for you and your clients. Using our UL recognized label system allows you to file for a label adoption, significantly reducing the time, cost and effort of adding a product to a UL file.
